

March 4k Professional Development

Supporting Child Led Learning in the Outdoors

Monday, March 13th 2:00 - 3:30 UW Preschool Lab

Research continues to support the best practice of preschoolers spending time outdoors in natural settings. This session will explore what it looks like to support preschoolers in child centered and child lead learning - all outdoors in natural environments. You don't need a whole forest, given the opportunity, children get deeply engaged in unstructured spaces right beyond your door.

Join Linda Dykstra- Instructional Specialist UW Madison Preschool Lab to see if this approach can help you and your students increase originality, cooperation, and an eagerness to learn - all of which enhance literacy, math, science, art and emotional development. Plus enjoy a tour of the Preschool Lab playground and surrounding areas!

WHERE: Room 1199, UW Preschool Lab, 1300 Linden Drive, Madison Wi FREE PARKING is available at Lot Z in Eagle Heights (corner of Eagle Heights Dr. and Lake Mendota Dr, right as you turn on Eagle Heights Dr. Simply park and hop on the [#80 bus](#) to the Preschool Lab.
